

Prunus persica

‘Klara Mayer’

FLOWERING PEACH

Don’t strangle your tree. Please remove label and tie, and file label for reference. Illustrations and notes intended as a guide only. Estimated size at 20 years.

FLOWERING PEACH

Prunus persica

‘Klara Mayer’

A double, pink-flowering peach with ‘ruffled’ petals that make a pretty feature for small gardens.

Foliage: Light green, lanceolate leaves with a long tapered point.

Flowers: Double, rose-pink flowers with many ‘frilly’ petals in early to mid-spring.

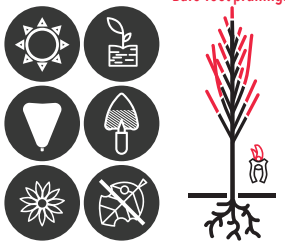
Fruit: Small, inedible peaches can occassionally be produced.

Culture: Adaptable to varied site conditions, but prefers moist, well-drained fertile soils and a position receiving full sun to part-shade. Flowers best in full sun and when pruned annually, immediately after flowering. Spraying to prevent leaf curl is recommended.

Size: 4 x 4 metres at 20 years.

Care: For more information on planting, maintenance and care visit flemings.com.au

Bare-root pruning:



Prune each limb by 50% just above a bud. Remove all broken or any unwated limbs.
