

Gleditsia triacanthos var. inermis

'Shademaster'

HONEY-LOCUST

Don't strangle your tree. Please remove label and tie, and file label for reference. Illustrations and notes intended as a guide only. Estimated size at 20 years.

HONEY-LOCUST

Gleditsia triacanthos var. inermis

'Shademaster'

A vigorous growing form that develops graceful ascending branches. This popular and adaptable cultivar is suitable as a shade tree in larger properties, parks, gardens and streets.

Foliage:	Dark, emerald green bipinnate leaves turn yellow in autumn. Leaflets quite large.
Flowers:	Inconspicuous green racemes; blooms in spring.
Fruit:	Produces large brown flattened pods which tend to persist on the tree well into winter.
Culture:	Can tolerate urban sites, air pollution, moderately saline soils, low levels of drought and occasional wetness. Performs best in moist, deep, fertile soils in a position receiving full sun. Relatively pest and disease free.
Size:	11 x 8 metres.
Plant Care:	For more information on planting, maintenance and care visit flemings.com.au

Bare-root pruning:

Prune each limb by 50% just above a bud. Remove all broken or unwanted limbs.
