Repeat flowering Hydrangeas are here!

My Auntie Glad used to get all thingy about cutting back her hydrangeas. It had to be done at the right time of the year, carefully keeping the flowers to be dried for floral arrangements and then you had to cut the canes back to the correct bud at the correct length or ... DISASTER!

No flowers the following season, no stunning blooms for the floral arrangements at the church, no beautiful large flowerheads to dry for later in the season. Cutting fresh flowers for arrangements had to be done with all manner of planning ... would it or wouldn't it affect next years blooms. Oh the pain, the agony!

Not any more! These days you can have beautiful hydrangea blooms all season long, prune or cut flowers whenever you like, and they'll bud up again producing seemingly endless fresh blooms.

And the name of the stress-relieving miracle of modern horticulture - **Endless Summer**. *Hydrangea macrophylla* 'Bailmer' Endless Summer™ to be exact, but you don't care about that, just remember if you love hydrangeas in flower you can have them spring, summer and autumn. **Just ask for an Endless Summer!**

- Blue flowers in acid soils
- Blooms on both old and new wood
- No need to think about how to prune
- Pink flowers in alkaline soils
- No need to worry about when to prune
- 'Stress-free' hydrangeas are here!
