

Euonymus alatus

'Compactus'

DWARF BURNING BUSH

Don't strangle your tree. Please remove label and tie, and file label for reference. Illustrations and notes intended as a guide only. Estimated size at 20 years.

DWARF BURNING BUSH

Euonymus alatus

'Compactus'

A slow growing, compact shrub that performs well in sun or shade. Noted for brilliant autumn foliage colour even when grown in quite shady positions. Suitable as an attractive hedging or specimen plant in parks and gardens and for mass plantings.

Foliage:	Mid-green obovate leaves up to 5 cm long, turning intense (almost iridescent) pinkish-red to burgundy in autumn and persisting for an extended period.
Flowers:	Insignificant, yellowish-green flowers in groups of three. Generally concealed by foliage.
Fruit:	Insignificant capsules containing small seed with a bright orange coat.
Culture:	Suited to cooler climates. Best grown in moist, well-drained positions. Should be mulched and irrigated when grown in dry conditions. Adaptable to soils of varied pH. Can be grown in full sun to shade. Tolerant of heavy pruning.
Size:	1.8 x 2 metres.
Plant Care:	For more information on planting, maintenance and care visit flemings.com.au

Bare-root pruning:

TBC
